Duration	6
Dates	19 Apr 2025 – 26 Apr 2025
Format & Platform	Zoom & Youtube Exclusive
Instructor	Sultan Aulia
Language	English
Certificate	Taalenta e-Certificate (per package)

Why Join

1. Master AI to Stay Ahead in a Competitive World

As AI continues to reshape industries, professionals who fail to adapt may struggle to stay relevant. This class provides practical knowledge of AI tools, ensuring you remain ahead in an increasingly digital landscape.

2. Enhance Research and Academic Writing with AI

Traditional research methods can be time-consuming and inefficient, often leading to challenges in sourcing credible information and managing citations. This class equips you with AI-driven techniques to streamline academic work, improving accuracy and productivity.

3. Automate Tasks and Boost Productivity with AI

Managing repetitive tasks such as transcriptions and document creation can limit your focus on higher-value work. By integrating AI automation, this class helps you optimize workflows, saving time and enhancing productivity.

4. Leverage AI for Smarter Stock & Crypto Investments

Navigating stock and crypto markets without proper analysis can lead to uninformed investment choices. This class introduces AI-powered market analysis, enabling you to interpret trends and make strategic financial decisions.

5. Unlock AI's Full Potential for Creative Content Generation

Producing high-quality images, videos, and music traditionally requires specialized software and skills. AI tools now democratize this, allowing you to generate professional-grade content efficiently and creatively.

Course Outline

1. Introduction to AI Tools & Prompting

- Overview of AI-powered tools and real-world applications.
- DeepSeek, Qwen, and Ollama O3: Strengths & use cases.
- RTF, TAG, and RACE frameworks for better AI responses.
- Custom ChatGPT instructions, diagrams, spreadsheets, and stock & crypto analysis.

2. AI for Academic Research & Writing

- Journal search, paraphrasing, and citation analysis.
- Meeting transcripts, automated minutes, and AI-generated slides.

3. AI for Creative Content

- Generating images, music, and videos with AI.

Instructor Profile

Sultan Aulia

AI Enablement and Corporate Training Specialist

Sultan Aulia is a multidisciplinary professional with experience across copywriting, library management, strategic learning, and corporate training. He is known as a change agent who champions the use of AI technology to address modern communication and learning challenges. His expertise spans AI-driven communication strategy, transformative learning innovation, library optimization, results-focused copywriting, and the development of corporate training programs. Sultan is also a trusted strategic partner in designing innovative, technology-based solutions that drive organizational growth and success.
